

```
#include <stdio.h>
#include <math.h>
int main()
{
    float F, C;
    printf("Enter the degree in Celcius:");
    scanf("%f", &C);
    F = (C * 9) / 5 + 32;
    printf("The degree in Far-enheit is %f", F);
    return 0;
}
```
